General Comments

CCO 314, SAMPLING AND TESTING A354 GRADE BD MATERIAL:

There is no work in the field on this operation today by ABF. ABF is not working on site today because of the President's Day Holiday. No rods in the Townsend Test (Test IV) test rigs are under load. Disassembly of TR's 5-11 is currently in progress by ABF.

INSPECTOR OT REMARK:

Office 6 hours on President's Day Holiday: I am at work to address issues on CCO 314, including EWB's due tomorrow, updating the estimate for the completed and remaining work on the force account CCO 314, and starting a presentation for a public technical workshop on A354 Grade BD materials scheduled for 2/26/2014. The public technical workshop is in a week and a half, but all presentations are expected to be completed (as requested by CT management) in a few days for review by all members of the panel. My presentation is expected to be a half hour and summarize the locations and tension levels of all A354 Grade BD rods on the SFOBB SAS, as well as provide other significant fabrication details for the different rod types. I also spend a portion of the day responding to questions from the DJV, which are questions from Dr. Townsend on field details of the work on the Townsend Test (Test IV). My shift and OT hours are 0900 to 1530.
